

Modern Slavery Act 2015

Plug Me In (Solar) Limited

Modern Slavery and Human Trafficking Statement

Introduction

Plug Me In (Solar) Limited (previously Environmental Energies Limited) provides solar PV, battery solutions and Electric Vehicle ("EV") chargers,

This statement sets out the approach taken by Plug Me In (Solar) Limited ("Plug Me In") (Reg No 757 8432 in England and Wales) (formally Environmental Energies Limited) towards identifying and preventing modern slavery and human trafficking in its business and supply chains, as required under the Modern Slavery Act 2015 (the "Act").

Plug Me In is committed to improving its practices to combat modern slavery and human trafficking.

In previous years our statement has covered Plug Me In Limited (Reg No 13515633 in England and Wales) and Plug Me In (Heat) Limited (Reg No 13048116 in England and Wales), however, these companies are no longer open to and contracting new business.

Our business and structure

Plug Me In is part of the Calisen Group (Holdings) Limited ("Calisen") group of companies. As is common with businesses that operate as a group, a number of back office and support functions are performed at group level, rather than within each individual entity. References to some of the policies, practices and procedures set out below may be conducted on behalf of Plug Me In by another group entity.

Plug Me In is an accredited installer of solar PV and battery solutions for commercial and residential properties, and EV charge point installation.

Plug Me In utilises several supply chains to achieve this.

Plug Me In's supply chains

As an expanding business with a number of suppliers, Plug Me In recognises that there is a risk (however small) of modern slavery or human trafficking occurring in its supply chains. Plug Me In takes a zero-tolerance approach to modern slavery and human trafficking and adheres to the strictest behaviours and standards and expects the same of its suppliers. Plug Me In therefore seeks to partner with suppliers that ensure a fair and ethical workplace, where workers are treated with dignity and respect and the highest standards of human rights are upheld.

Plug Me In's policies

Plug Me In has a range of policies and procedures in place that are designed to support all employees across a range of issues. Integral to those policies are measures to support the prevention of modern slavery and human trafficking.

Plug Me In reviews all of its policies on a regular basis to ensure that they are fit for purpose and uploads them to its online document management portal for all employees to access.

Plug Me In undertakes due diligence before on boarding a new supplier.

It is a fundamental requirement of Plug Me In to conduct its business with integrity and in accordance with the highest standards of ethics, equity and fair dealing.

Plug Me In is committed to ensuring that there is no modern slavery or human trafficking in its supply chains or in any part of its business.

The Calisen Vendor Management Policy also reflects Plug Me In's commitment to acting ethically and with integrity in all its business relationships and to implementing and enforcing effective systems and controls to ensure slavery and human trafficking is not taking place anywhere in its supply chains. Alongside the Calisen group policies, Plug Me In is also aware of the UN Global Compact's 10 Principles. There are a number of internationally recognised declarations, standards and codes that it is aware of and respects, including: (i) the UN Universal Declaration of Human Rights, (ii) UN Guiding Principles of Business and Human Rights, (iii) International Labour Organisation core conventions, and (iv) the Code of Ethical Trading Initiative.

Due diligence processes for modern slavery and human trafficking

Plug Me In take steps to ensure that all relevant aspects of legal compliance and due diligence requirements are identified in respect of human trafficking and modern slavery.

Internally, as part of Plug Me In's recruitment and on-boarding process, it ensures that all employees have valid right to work status for the UK and can produce their own documents as requested, whilst also holding agency and contracting workers to this same standard.

Plug Me In sources a wide variety of items from a range of suppliers and works to ensure that the items provided are to the highest safety standards and best meet the needs of its business. This includes items such as company vehicles, uniforms, tools and IT hardware. Plug Me In also contracts with suppliers who provide services such as waste management.

Plug Me In utilises group procurement functions and established policies and procedures when onboarding new suppliers.

As part of Plug Me In's approach to combat modern slavery and human tracking, typically a number of physical site visits to suppliers are undertaken in each financial year. When physical audits are not possible, virtual audits of selected suppliers are being undertaken to ensure compliance with the Act in accordance with Plug Me In's standards.

Vendor adherence to Plug Me In's values

Plug Me In believes that it is important for all third parties that it works with to morally align with Plug Me In's corporate values, to ensure that such organisations can build long term and mutually beneficial relationships. As part of Plug Me In's due diligence process, it ensures that all organisations who are engaged have equivalent Modern Slavery and Human Trafficking statements in place that are easily accessible to other third parties.

Training

Plug Me In has implemented an online training program on modern slavery to increase awareness amongst all staff. All new starters will complete this training on joining Plug Me In and all existing staff will be required to complete this training every two or three years depending upon their role within Plug Me In.

Plug Me In's effectiveness in combating modern slavery and human trafficking

As a service business, Plug Me In works with a large number of external organisations and suppliers to deliver the desired service(s) to customers, and so it is accepted that this diverse network brings with it some risks that are continually managed and monitored. Below is a non-exhaustive list of the areas that Plug Me In has highlighted as its higher risk areas:

- Solar Panels – Our solar panels are procured from reputable manufacturers who adhere to regulations and standards. Plug Me In takes proactive measures to ensure that our suppliers operate ethically and transparently, with no tolerance for modern slavery or human trafficking. We work closely with our suppliers to monitor their practices and ensure that the solar panels we provide are produced in a socially responsible manner.
- Batteries – The batteries used in our installations are sourced from well-established suppliers who prioritise ethical practices and compliance. Through supplier assessments and ongoing monitoring, the batteries we use are free from any form of modern slavery and are produced sustainably.
- EV charge points – the EV charge points installed by Plug Me In are either provided as part of its contractual arrangements with third party suppliers, or direct from reputable wholesalers. Plug Me In ensures that all necessary steps are taken with suppliers to be assured that the EV charge points are manufactured in line with all applicable standards and regulations concerning safety, environmental standards, financial controls and modern slavery and human trafficking;
- textiles – the textiles industry is highlighted as a key risk area for modern slavery and human trafficking, especially with regard to child labour and poor working conditions. As Plug Me In provides the majority of its workforce with Plug Me In uniforms

and Personal Protective Equipment (PPE), Plug Me In utilises its due diligence checks and contractual agreements to maintain effective controls and ensure that all relevant parties adhere to the necessary regulations and minimise all identified risks;

- IT hardware – across Plug Me In, a wide range of IT hardware is used to meet the needs of each business area and such hardware is continually being replaced and upgraded. The IT infrastructure in PMI is governed by the Calisen IT department and subject to the Calisen Group Modern Slavery Act statement [\[insert link\]](#). The global IT hardware supply chain has been identified as a growing concern in the context of modern slavery and human trafficking due to the unlicensed supply of the rare earth metals required in the manufacturing process, and the use of specific manufacturing locations chosen for their labour costs in order to drive lower prices. To ensure that the hardware that Plug Me In uses is not linked to this type of issue, only reputable suppliers and brands are engaged and Plug Me In's supplier due diligence process is also applied to ensure that such suppliers have measures in place to prevent modern slavery and human trafficking in their supply chains;
- visas and work permits – As part of the diverse workforce at Plug Me In, there are some employees who require visas to work in the UK. These visas are reviewed before employment commences and then re-verified 6 weeks prior to expiration to ensure that such employees continue to have the correct authorisation to work in the UK. This is managed by the Group's internal Human Resources system on behalf of Plug Me In, which generates a workflow reminder to ensure that this process is carried out in time to avoid or limit any disruption to the employee's contract. If any concerns are raised during initial verification or re-examination due to expiration, such concerns are appropriately escalated and investigated.

Further steps

Plug Me In is committed to continual improvement and will take active measures to combat modern slavery and human trafficking in its business and supply chains.

This statement is made under section 54(1) of the Modern Slavery Act 2015 and constitutes Plug Me In (Solar) Limited's Modern Slavery and Human Trafficking Statement for the financial year ending 31 December 2025.

This statement has been approved by Plug Me In (Solar) Limited's board of directors and will be reviewed annually.

Approved by the Board: 27 March 2026
